InfoSec People

InfoSec People is a boutique cyber and technology recruitment consultancy, built by genuine experts. We were founded with one goal in mind: **to inspire people to find the careers that inspire them.**

With the success of companies fundamentally driven by the quality of their people, acquiring and retaining talent has never been more important. We believe that recruitment, executed effectively, elevates and enables your business to prosper.

We also understand that recruitment can genuinely change people's lives and as such, take the duty of care to those we represent very seriously.

Great People, Great Companies

All companies start with an idea. But truly great companies continue to evolve their ideas, empower their people and encourage innovation. They attract and inspire already motivated people to achieve great things.

The attraction and retention of talent however, remains a challenge for almost every business. Our mission is to effectively connect motivated people in the cyber security and technology sectors with great companies like yours, ensuring secure business enablement and prosperity.

If you believe what we believe – **that good business is based on honest, transparent, trusted relationships** – then our core values will also resonate with you.

Our core values

- 🕒 Be the best we can be
- 🕒 Always do the right thing
- 🕒 Add value

People don't
buy what you
do, **they buy**
why you do it.

Simon Sinek

We find
individuals
in a sea of
professionals.

As a trusted partner to FTSE100 global corporates and high-growth cyber SMEs alike, InfoSec offers proven cyber security talent acquisition capabilities for your business, from CISO Executive Search engagements to strategic cyber team-builds.

A Passion for Cyber

Cyber security is no longer a necessary evil, but a significant enabler for your business. Whether you are a FTSE100 global corporate, Managed Service Security Provider or an established Cyber Security Consultancy, confidence in your cyber security posture enables the effective adoption of digital strategies, pursuit of technical innovation and enhanced customer confidence in your brand.

For over a decade, InfoSec People has worked tirelessly to build meaningful relationships in cyber security – it's more than just a day job, it's our passion.

The cyber security landscape has changed immeasurably since our inception in 2008 and is now one of the most contested sectors for talent globally. As a trusted partner to global corporates and high-growth cyber SMEs alike, InfoSec People offers proven cyber security talent acquisition capabilities for your business, from CISO Search engagements to strategic cyber team-builds.

Proven Commitment to the Sector

InfoSec People are committed to positively contributing to the cyber security community. In 2016, InfoSec People's founder Chris Dunning-Walton, founded Cyber Cheltenham (CyNam - www.cynam.org), a platform for Cheltenham's thriving cyber security community to collaborate, network and innovate. CyNam is now the UK's largest cyber cluster, and has gained full support from GCHQ, NCSC, DCMS and the Gloucestershire Police, as well as local government and academia with over 1000+ people attending headline events - both virtually and in-person.

InfoSec People are also partnered with the innovation company and workspace solving society's challenges through collaboration on technology with government, startups and industry, Plexal. InfoSec People are the official Talent Acquisition Partner, enabling the scale-up businesses who are part of the cyber and tech accelerators to benefit from our free mentoring sessions on how to attract, hire and retain top cyber and tech talent.

We are determined in the pursuit and development of talent, regardless of the background of the individual.

Commitment to EDI & Neurodiversity

InfoSec People is committed to the principles of equality, diversity and inclusion, and neurodiversity in both our workplace and throughout our recruitment processes. We are determined in the pursuit and development of talent, regardless of the background of the individual. We follow best practice in all of the nine different areas of equality, namely: age, gender/gender reassignment, disability, religion, ethnicity, marital status, maternal status, and sexual orientation.

While significant progress has been made with regards to gender diversity in the sector, we continue to work proactively across the diversity agenda. InfoSec employ a range of techniques to help us source diverse candidate fields for our clients. This is underpinned by a strong values-driven approach of being professional, supportive, open and honest with candidates and clients.

As part of our commitment to diversity and neurodiversity, it is our intent to ensure that all shortlists submitted reflect diversity wherever possible.

In the right place at the right time?

Active Network

LinkedIn, specialist job boards and other professional networking portals have made the access to passive talent pools easier than ever before in the digital landscape. However, counter intuitively to this, actually engaging in conversation with this passive network of people has never been harder, especially in highly buoyant markets such as cyber security where candidates receive an extremely high number of approaches from recruiters on a daily basis.

InfoSec clients benefit from our active network of cyber security professionals, developed through over a decade of building trusted relationships and engagements with CISOs down. Our strong brand identity and proven market knowledge in cyber allows us to position your business effectively with the right people who value working with us as an industry specialist.

As a client partnering with us, you benefit from our unrivalled ability to quickly and effectively leverage our active contacts and the wider cyber security talent network for your vacant positions.

It's more about
knowing where to look

National Reach

InfoSec has proven capability in the provision of cyber security talent acquisition across the UK and EU. We have also naturally developed an intimate knowledge and enviable network of cyber security talent in the West Midlands and South West UK, close to our HQ offices in Cheltenham.

Successfully delivered engagements have been with some of the UKs biggest and most exciting employers, including:

More than just recruitment

Cheltenham is a thriving town full of exciting start ups and global tech companies. At InfoSec People we play a huge part in this community and are involved in a number of exciting initiatives which support the wider cyber technology industry.

We are affiliated with and accredited by the following organisations:

We are determined in the pursuit and development of talent, regardless of the background of the individual.

Commitment to Diversity

InfoSec is committed to the principles of equality, diversity and inclusion in both our workplace and throughout our recruitment processes. We are determined in the pursuit and development of talent, regardless of the background of the individual. We follow best practice in all of the nine different areas of equality, namely: age, gender/gender reassignment, disability, religion, ethnicity, marital status, maternal status, and sexual orientation.

While significant progress has been made with regards to gender diversity in the sector, we continue to work proactively across the diversity agenda. InfoSec employ a range of techniques to help us source diverse candidate fields for our clients. This is underpinned by a strong values-driven approach of being professional, supportive, open and honest with candidates and clients.

As part of our commitment to diversity, it is our intent to ensure that all shortlists submitted reflect diversity wherever possible.

Clear Assignment Process

InfoSec People have a proven approach defined for each engagement, which can be tailored to the exacting needs of your business. In brief, this includes:

Initial client briefing

Search strategy Definition & Candidate Identification

Candidate qualification and shortlist presentation

Interview management

Offer negotiation, on-boarding and integration

Ongoing support and extension management
